

#### **Hurricane Lite Installation Hardware**

(1) Fuel Filter relocation bracket allows filter assembly to be moved slightly forward to accommodate larger outer "Cooling" exhaust tube of the Hurricane Lite headers. (4) 5/16 x1-1/2" bolts and nuts are supplied for reattaching the fuel water separator and (4) 1/4 X 1" bolts and nuts are supplied for reattachment of the bracket to the engine. There is a 1/4 hole at the end of the bracket that will allow the factory dipstick mounting tab to be straightened out and attached to this location.

(2) A flexible replacement stainless braided fuel line is included replace the hard steel line from the fuel filter/water separator to the fuel pump. Simply turn th factory fitting for proper alignment to the hose ends for easy attachment.
